

Dear FCC, Congress:

I am writing to voice my concern about the NAB's petition to prevent XM radio from providing local weather and traffic information. I am writing this from my basement as I am seeking shelter from a tornado warning that I just heard on the St. Louis XM weather channel! Their ability to provide dedicated local weather and traffic is better than any local station is capable of. I listen to my XM in the car and at home and would be very, very dissatisfied with the FCC if their traffic and weather coverage was terminated.

I don't believe the FCC should be protecting the interests of one broadcasting group above another. I think the NAB members need to improve their service in order to compete and they should leave the federal government out of it!

Thank you,
Josh Peck
